The experience of users...

*"I work in a canteen providing meals to over six hundred workers... my hands are constantly in and out of water. Thank goodness for **mxhealthcare skin protection** it does exactly what you say in the brochure and protects me from the water and has stopped my hands from being red raw..."*

*"As a mechanic who works with aircraft and their components, I never really thought about my skin. After my wife brought **mxhealthcare skin protection** home and convinced me to try it, I was sold and now I won't go to work without using it. My hands clean up easily and feel great at the end of my work day."*

*"I have always suffered with sensitivities to many materials, especially my jewellery and cosmetics. Since I began using **mxhealthcare skin protection** these problems have been pretty much removed from my life. Thank you for a great product."*

mxhealthcare™

skin protection®

A moisturising
barrier cream resistant
to many harmful materials
such as caustics and acids
even after 8 times washing.

mxhealthcare™ skin protection®

Now proven to help prevent the spread of bacteria!

Discover what thousands of people already know - **mxhealthcare™ skin protection®** makes a real difference to skin care!

mxhealthcare skin protection is one of THE most effective skin protection products on the market.

It gives superb protection for your skin from hundreds of harmful materials at home, during leisure activities, in the garden or even at work.

At the same time, it moisturises, keeping your skin soft and supple. We know you'll be impressed.

Each time you apply **mxhealthcare skin protection**, it creates an invisible, non-greasy barrier which prevents irritants and potentially harmful substances from penetrating the hands and face - and other skin surfaces - for up to four hours. Your skin continues to 'breathe' normally!

What's more, **mxhealthcare skin protection** will help protect your skin from ageing and the 'drying out' effects of water. That means better value for you - and your skin!

It is completely safe for use when preparing food.

mxhealthcare skin protection is safe for use on children and infants and is an excellent preventative against nappy rash and childhood eczema.

mxhealthcare™ skin protection®

effective all-over skin protection for all the family.

In the home: *protection against...*

- constant exposure to water
- detergents and harsh soaps
- bleaches
