mxhealthcare™
sterilant spray®

**The Bug
Blitzer**

A biodegradable, eco-friendly,
safe and effective answer for
cold sterilisation

mxhealthcare™ sterilant spray®

Proven to help prevent the spread of bacteria!

Providing a highly effective but non toxic solution to disinfection in **all** areas.

The power of Super Oxygenated water now harnessed by mxhealthcare in the form of a stable spray and sterilant wipes to provide a safe and very effective cold sterilant retaining its sporicidal action for at least 6 months.

- **No toxic or other side effects even if consumed**
- **No toxic or other side effects if spilled**
- **No toxic or other side effects if added to waste water**
- **No detrimental effect to humans or animals**

BUT KILLS INFECTION!!

Its powerful biocidal properties are truly remarkable for a solution based on such apparently harmless chemistry.

Not only is it bactericidal but also virucidal, fungicidal and, most importantly, sporicidal. It reacts at the molecular level by deactivating the protective EPS cell wall and denaturing

the cells components. The blended surfactant improves wetting characteristics and the cleaning effect. **mxhealthcare sanitiser spray** contains no alcohol.

As a safe and effective cold disinfectant, with none of the health issues or long contact times associated with alcohol-based alternatives and none of the potential risks from chlorine-based products. By being based on electrolysed brine, **mxhealthcare sanitiser spray** provides the benefits of chlorine without the possible carcinogenic side effects.

mxhealthcare sanitiser spray is a versatile and powerful weapon against MRSA and hospital acquired infection in general....yet it is safe to use and harmless to the user and the environment. It is an economical and highly effective way of disinfecting and sterilising critical environments.

Just look at the benefits...

- High-level disinfectant/sterilant
- Sporicidal as well as bactericidal, virucidal and fungicidal
- 3-in-1 action
- No activation required
- Contains no alcohol
- Harmless to user and environment
- Long shelf life

Potential areas for use:

- All hard and soft surfaces where infection is a risk
- personal hand hygiene
- Animal house disinfection
- Food/salad washing
- Linen disinfection in the home and laundries
- surgical instrument disinfection
- pre-wash for infection sensitive items such as tools, equipment, beds.

mxhealthcare™ sterilant spray®

effective protection against infection for all the family.
